POLYMERIZATION OF ACETONE, tr. by L. Gawronska.
9 Mar 61, 4p. 8 refs. Courtaulds Misc. Lit. 3282:
[DSIR LLU] M. 3203.
Order from OTS or SLA \$1.10 61-27645

Trans. of Akad[emiya] Nauk SSSR. Doklady, 1960,
v. 134, no. 5, p. 1098-1099.

DESCRIPTORS: *Polymerization, *Acetones.

This investigation of acetone polymerization indicates that by applying the principle of preliminary orientation of monomer molecules in the reaction system it is possible to polymerize substances, which do not polymerize under normal conditions. In this case the orientation was obtained by crystallization of the monomer. The conditions, favouring kinetically the formation of polymer chains from the oriented monomer molecules. 209068

Tests showed that with the increase of irregularity in the copolymer chains, the perfectness of crystalline regions is reduced. The diffraction picture of the crystalline regions is structurally similar to that of polyethylene or polypropylene. There are no intermediate structures or changes in the parameters that would suggest the arising of stresses in the crystals. (Chemistry--Physical, TT, v. 7, no. 11) (over)

ON THE STRUCTURE OF STATIONARY RANDOM
FUNCTIONS. [1962] 37p. 13 refs.
Order from SLA \$3.60

63-10779

Trans. of Arkiv for Matematik (Sweden) 1949, v. 1,
no. 13, p. 141-160.

DESCRIPTORS: *Statistical functions, Correlation
techniques.

The development of a uniform linear theory of random
functions and its applications to stationary random
functions is attempted.
